# HonorHealth Heart Care

IMPACT REPORT

## Your Generosity Heals Hearts!

When we asked for your support for a major expansion to HonorHealth HonorHealth's new cardiovascular center of excellence, you answered the call — and we are so grateful. Your generosity fuels lifesaving innovations, compassionate care and groundbreaking advancements at HonorHealth Heart Care.

Because of you, we are expanding vital services, enhancing patient experiences and shaping the future of heart care for generations to come.

Your whole-hearted kindness and visionary philanthropy have a ripple effect — touching the lives of patients, their loving families and our entire community.

***Thank you for being a champion of heart health and a true partner in our mission to heal, save and transform lives!***

“Your gift provides life-changing and life-saving programs and services that empower physicians, nurses and technicians with revolutionary ways to look at the heart.

Although you may never know the many individuals benefiting from your generosity, they will know their hearts keep a steady beat because of you.”

FUTURE PLANS.

## MAKING GREAT CARE POSSIBLE IS ONLY THE BEGINNING!

HonorHealth is already sharpening the cutting edge of new cardiovascular treatments and technologies, but a renowned center of excellence requires continued investment in expertise, infrastructure, services and technology.

Those investments are beginning to take shape at the HonorHealth Scottsdale Shea Medical Center. The expanded Heart Care Center welcomes patients, families and the public with a spacious new lobby and registration area.

Its features declare that this is a place that supports healthy living and heart care education, including:

- Convenient patient registration for visits or procedures
- Patio and outdoor space for fresh air and contemplation
- A heart care education center
- Blood pressure self-monitoring station
- Digital monitor with educational and wellness messages
- The Vitality Café, a juice bar and café, with healthy food choices, including anti-inflammatory and heart-healthy options

Also on the first floor, this expansive area adds three new cardiac catheterization labs featuring state-of-the-art technology.

The new Ambulatory Surgery Center (ASC) offers all the expertise and resources of an inpatient hospital with the convenience and efficiency of an outpatient surgery center.

In the unlikely event of an emergency, the patient is close to the Emergency Department and Cardiac ICU, with all the expertise that may be needed.

The next phase of expansion is a step-down unit for patients who require observation and care but do not require intensive care.

And for our patients who have acute heart problems, many with multiple complications that require round-the-clock, specialized care, the Cardiac Intensive Care Unit assembles the talent and technology to provide the highest level of care available.

All of this and more is made possible by donors like you. And for that, we are grateful!

## *Your Generosity in Action*

For more than a year, Marie had been putting off heart surgery. Her leaky aortic valve made her tired and short of breath. Left untreated, she would very likely suffer a heart attack.

The thought of open-heart surgery held her back – but not out of fear for her own well-being. As the primary caregiver for her husband, who suffered permanent disability from a stroke, she needed to be strong and at her best.

Marie's aortic valve could not close tightly, allowing blood to leak backward into the left ventricle with each heartbeat, a condition called aortic regurgitation. The condition forces the heart to work harder to pump blood with every beat, leading to an enlarged heart and eventually, heart failure.

Previously, the only treatment for aortic regurgitation was open-heart

surgery. But the HonorHealth Heart Care team had been studying a non-surgical, catheter-based technique to treat patients like Marie, who are not good surgical candidates for open heart surgery. The experimental J-Valve seemed to be the perfect option.

In this procedure, the J-Valve is delivered via catheter through the leg. Once in place, the patch is clipped over the leaky valve.

"I was out of the hospital in less than two days and back home with no pain. In just a couple of months, I was back to running three miles every morning, no more shortness of breath. It was a miracle!"

HonorHealth Foundation is grateful for outcomes like these, the patients who share their stories and the donors who partner with us to save more lives!

## BECAUSE OF YOU

As a nonprofit, community-based hospital system, HonorHealth relies on your kindness and generosity to help provide the exceptional care you and your family expect and deserve.

Every patient's experience with HonorHealth is enhanced through philanthropy. Because of you, HonorHealth Heart Care does more than relieve the suffering of those with heart disease. Your whole-hearted gift ensures the expansion of vital services for you, the people you love...and countless others.

Giving through HonorHealth Foundation means you're supporting more than great care – your contributions improve health and well-being, fuel medical breakthroughs, drive innovative research and so much more.

Our vision for advancing cardiovascular care requires the support of donors like you. We thank you for making your gift and joining HonorHealth Heart Care in helping to defeat this devastating disease!
